

Print size check

BAKERY PHONE ORDER RECORD / FREE SAMPLE / NOT AN ORDER FORM

1. Match the paper and check the edges

This PDF is A4. Load matching paper and select Actual size / 100%.

All four edges of the gray box should be visible in the preview and on paper.

If you use Fit to avoid clipping, the ruler and writing spaces become smaller.

A successful sample does not guarantee every printer or the full form will suit you.

2. Try your usual handwriting

WRITE A DATE AND TIME

WRITE A NAME OR SHORT NOTE

TRY A LONGER NOTE ON THIS LINE

3. Try one item row

QTY + UNIT	ITEM / SIZE	DETAILS / MESSAGE

This row has the same column widths and writing height as the complete record.

4. Check the scale with a ruler

At 100%, measure between the two end ticks of either bar.

50 mm

2 inches

If the bar is shorter, assess the reduced writing spaces before choosing the full record.

Before you ask for the full record

Check clipping, legibility and whether your usual handwriting fits.

The complete record has four item rows, plus customer, pickup and handover fields.

This free page is a size sample. It is not a complete order record.

Individual PDF apps and physical printers have not been tested by Jodex.

Small-print sample: this uses the same 7-point type size as the full record footer.
